2. Create a drawing that illustrates how to calculate GDP. Represent each component of the formula with an illustration, a label, and a definition.
3. Complete a table like the one below. Then answer these questions: Which of these measures would an economist use to compare GDP from various time periods, and why? Which measure would an economist use to compare the GDP of various countries, and why?

Real GDP		
Per capita GDP

Section 3

2. Complete a table like the one below. Then answer these questions: Which type of unemployment do you think is most associated with an unhealthy economy? Why? Does an economy with full employment have any of these types of unemployment? Why or why not?

Type of Unemployment	Definition	Example

3. Do you think the unemployment rate is a good measure of economic health? Why or why not?

Section 4

1. Create a drawing that illustrates how to calculate the inflation rate using the consumer price index. Define and include one or more symbols to represent the CPI.

	Definition	How is it measured?
Nominal cost of living		
Real cost of living		
Nominal wages		
Real wages		

3. A graphic organizer is a diagram for visually organizing and recording information about a particular subject. Design a graphic organizer for recording notes about the three types of inflation. For each type of inflation, include a definition, an example, and a summary of its effects.
4. What are the main causes of inflation?
5. Draw a simple flowchart to show how the wage-price spiral contributes to the inflation rate.
6. Do you think the inflation rate is a good measure of economic health? Why or why not?

Section 5

1. Create a drawing that illustrates how the business cycle works. Represent each phase of the cycle with an illustration, a label, and a definition.
2. Complete a table like the one below. Describe the general behavior of the three key indicators during each phase.

	Real GDP	Unemployment Rate	Inflation Rate
Expansion			
Contraction			

3. Complete a T-chart with the heads below. Identify five or more items for each side.

Causes and Characteristics of an Expanding Economy	Causes and Characteristics of a Contracting Economy

PROCESSING

You are an analyst writing a column on current economic conditions for a national U.S. newspaper. Your column should clearly answer this question: *What do key indicators reveal about the health of the current U.S. economy?*

In your column, be sure to include

- recent data on gross domestic product, unemployment, and inflation.
- an explanation of what these key indicators reveal about the health of the economy.
- a forecast on whether the U.S. economy is in a contraction or an expansion phase.
- two or more visuals (graphs, tables, drawings, or photographs) related to your column.
